ABOUT

Software Engineer with 3 years of experience in web development. I build applications with React and TypeScript, working on complex interfaces, architecture, and reusable UI components. I write a technical blog. Vimmer.

SKILLS

TypeScript, Express, PostgreSQL, React, Redux Toolkit, Zustand, TanStack Query, React Router, Tailwind CSS, SCSS, FSD, Vite, Docker, NGINX.

EXPERIENCE

- **Center of Financial Technologies** Novosibirsk, Russia
  Software Engineer *April 2025 – Present*

  Stack: TypeScript, React, React Router, Redux Toolkit, Zustand, TanStack Query, Wouter, CSS, Webpack, Vite, FSD.

  Contribution: Worked on F.Doc, an electronic document signing service. Developed a document builder for creating templates and enabling customers to fill them out. Built complex forms with various field types and corresponding validation rules. Refined PDF document rendering, worked with the browser camera API, and implemented drag-and-drop interactions using React DnD. Built email templates with React Email. Designed and implemented the migration from Redux Toolkit to Zustand and TanStack Query. Restructured the project using Feature-Sliced Design (FSD) and migrated the build setup from Webpack to Vite. Reworked routing by replacing Wouter with React Router and adding session validation and route access control based on user roles and subscription plans. Designed and developed components for a UI library used across all company projects. Centralized the logic for handling metrics. Worked in a team with Agile processes and task tracking in Jira. Wrote technical documentation and conducted code reviews.

- **Tasty Franchise** Novosibirsk, Russia
  Software Engineer *January 2024 – March 2025*

  Stack: TypeScript, Express, PostgreSQL, React, React Router, Redux Toolkit, Tailwind CSS, Vite, Docker, NGINX.

  Contribution: Worked on internal products for a restaurant franchise. Designed and developed a system to automate restaurant inspections and ensure compliance with quality standards. Implemented authentication with role-based access control, built an admin panel for managing inspection checklists, and developed an interface for inspectors to complete inspections digitally. Automated report generation and improved data collection workflows. Maintained and enhanced existing internal products, ensuring reliability and expanding functionality. The system replaced paper-based inspections with a digital process, reducing operational costs and improving transparency of quality control.

EDUCATION

- **RANEPA** Novosibirsk, Russia
  Bachelor of Law *September 2020 – July 2024*
